Massive Global Environmental Change – Winners & losers

Some local winners of human enviro change :

Some local losers of human enviro change:

Woodland wildlife

Fair-go landscapes to help the ‘losers’

Shelter belt
corridors

Woodland
Conservation

Native grassland

Revegetation

Really rapid Environmental change

4 years

Rapid micro-climate change

Creek line (riparian) restoration

1. Get livestock out
2. Slow the water down
3. Plant as required

Plant the next generation of tree hollows

*Human aren't the only
builders*

Tree hollow, 20 years in the making

Your stories of helping creatures adapt to *environmental* change??
