

Climate Adaptation & Mitigation: winners and losers

David Freudenberger

Fenner School of the Environment & Society

Australian National University

Passive vent

Boric acid treated
shredded paper
Insulation on top of
R4 fiberglass batts

Mitigation

Reducing my fossil carbon emissions
since 1974

Used for just 20 min this summer

Double glazing

Winter Heating:

Local salvage for
past 20 years

Scaling up *Adaptation and Mitigation*

Climate change – a subtle and slow component of **Environmental Change**

Once were forests and woodlands.... very different climate now

Rivers dammed – fewer floods.... Very different environments now.....

Radically difference environment & climate created in 100 years

A very different forest environment – Tumut pine plantations – good for some....

Radical environmental change.... The rise and rise of the modern city
